

Express PLUS HEPA Vacuum

75000-10

The Express Plus HEPA Safety Vacuum comes with a .12 micron HEPA filter that is designed to extract lead dust, mold and other harmful contaminants. It is constructed with a grounding wire making it and all of its utensils 100% ESD safe. In addition, this model is manufactured with a line filter that filters the noise from the electrical line, making it safe to use in clean rooms and other noise sensitive areas.

The HEPA vacuum is ideal for sensitive electrical equipment, such as telecom switches and routers, hospital and laboratory equipment, sensitive manufacturing equipment, computers and digital printers of all types. It comes standard with a 6' toner-proof hose, toner-proof round dust brush, flexible goose neck, and a 12' power cord.
